6. New Business

A. Landowners appeared to describe deteriorating situation at their properties caused by beaver activity and asked for advice, assistance. A discussion followed on trapping, mechanical devices, fencing and other actions. The first selectman was present and promised bring the situation to the attention of town public works, contact state authorities about culvert capacity and pass on resources to the landowners.

B. Dan Watson from Lodestar Energy presented proposed solar project at the Town Farm property including a brief history of project and bid, auction requirements Lodestar met to be selected to proceed. In short, the project could produce 7-8 million kilowatt hours, supplying 1000 homes through the CT Community Energy program. The town approval process for this project is funneled through the Planning & Zoning Commission (P&Z) which forwards their recommendation for best possible use of the property to the CT Siting Council. Our agency can write a letter to P&Z. Discussion then focused on access roads and stormwater management basins with the commissioners asking for narratives for both the construction and maintenance of these features. Watson said the fenced areas will have a 4" gap at the bottom to allow animals to pass. The environmental consultant All-Points and engineer JB Russo are developing the final details which will be forwarded to Agency for review before the June meeting.

7. Old Business – Mead initiated a discussion of native wood chip berms for S&E controls, plus specifying biodegradable mesh wattles.
8. WEO Report – None
